

IoT SECURITY FEATURE

## Fundamentals of IoT Security

As IoT applications become mission critical, security is paramount. By their very nature, IoT ecosystems are vulnerable to security threats at multiple levels.

IoT DATA GATHERING FEATURE

## Future of Business Intelligence with AI Technology

Businesses have been deploying algorithms to analyze the data that has been generated for years since the introduction of IoT and data gathering tools. Some futuristic technologies like voice and facial recognition, task automation, and autonomous driving assistant are now the reality.
