TOUCH INTERFACE FEATURE

## The Era of Shared Touch is Ending

Using our hands and bodies has been the dominant means of control since the dawn of time. This of course is natural for activities like farming and hunting and made a lot of sense as service businesses emerged. As our machines got more intricate and complex, touch made a lot of sense for mechanical devices, and interestingly enough even in the rise of electronics, using buttons, knobs, and various finger-based controls has been pervasive.

### Innovations Created By the COVID-19 Pandemic

As I'm writing this, we are still stuck in the middle of the COVID-19 crisis in the U.S. and frankly, depending on which ?expert? you believe, we could be back to normal in anywhere from a month or two to many, many months. Here in Texas, where WINSYSTEMS is headquartered, they just announced that

schools are shutdown at least until the end of the school year and graduations are being rescheduled for June or July. But honestly, no one knows for sure when things will return to some semblance of business as usual.
