### RunSafe Alkemist Now Protects Yocto Builds from Memory Exploits

Alkemist helps reduce the attack surface of Yocto-built embedded systems, which contain identical images that mean a single vulnerability could potentially impact thousands of systems. Alkemist does this through a procedure called load-time function randomization (LFR).

### TT Electronics Launches Speed to Connect, End-to-End Connectivity Framework Accelerating Time to Market for Industrial IoT Solutions

TT Electronics announced the launch of 'Speed to Connect', a framework that enables customers to deploy smart IoT solutions quickly and more cost

effectively than going it alone, according to the company.

## **Why Blockchain Needs Storage to Drive the IoT Data Marketplace**

In order to make the IoT Data Marketplace, enabled by blockchain, a reality, storage is the fundamental layer for any data strategy. Clearly, larger capacities are required to support the rise in sensors and connected devices around the

world. But it's not just about storing the data. It's what you do with the insights gleaned from the data that counts.
