# IoT Age

there's a downside to this tsunami of IoT connected devices, which, as ResearchAndMarkets notes, will hit 25.1 billion in 2025, compared to 2017's 7.5 billion. There are the threats, which come in many forms, and the ability to accidentally or purposely poison data, to re-route cars, or to impact organizations' performance. There have been ransomware examples with PCs, and this is expected to continue within the IoT.
