WEBCAST

The Virtual IoT Device Security Conference

Sponsored by: **IAR Systems, Trusted Computing Group, Cypress**

Date: **November 10; 11:00 a.m. ET, 2:00 p.m. ET, 4:00 p.m. ET**

IoT DEVICE SECURITY FEATURE

SRAM PUF Provides an Unclonable Security Mechanism

Obviously your IoT devices need to be secure. Unfortunately, there are many ways to do that, so you need to pick the one (or ones) that best suit your needs. One of those methods is by using SRAM PUF, or physical unclonable function. Such a solution hails from Intrinsic-ID.

IoT DEVELOPMENT TOOLS NEWS

Silicon Labs Expands Wireless Module Portfolio with Four New Modules

Silicon Labs has expanded its portfolio of pre-certified wireless modules for IoT application development. The expansion is compiled of four new modules including the xGM210PB, BGM220, MGM220, and BGX220 Xpress.

5G TEST & MEASUREMENT NEWS

Rohde & Schwarz Adds Internal Analysis Bandwidth to FSVA3000 Analyzer

The R&S FSVA3000 was developed to support the production of 5G NR base stations, mobile phones, and components, specifically in the 28 GHz and 39 GHz bands.

IoT MANUFACTURING FEATURE

Improving Semiconductor Manufacturing Through Smart Technologies

Internet of things (IoT) devices have become the largest driver of semiconductor revenue, with wireless communication, automotive, and artificial intelligence products following in short order. This broad array of devices will bring far more variation to the industry, but optimizing manufacturing for such a diverse range of products will become an even greater hurdle.
