NETWORKING FEATURE

## Add Low Power and Mesh Networking to the Latest Bluetooth Innovations

Smaller, lower power, and longer range Bluetooth products continue to rain down from the silicon vendors. One good example of those innovations is the recently announced BGM220 series from Silicon Labs, which supports Bluetooth 5.2 with mesh networking capabilities.

Deployed at the Edge: Telemetry and Video Analytics in Industry 4.0

EMBEDDED EXECUTIVE PODCAST

## Ron Martino, SVP/GM, Business Line Edge Processing, NXP Semiconductors

Living at the Edge can be tricky. That's the Edge of the IoT that I'm referring to. When you're one of the leading providers of microprocessors, as NXP clearly is, you have lots of questions that must be addressed. Two big ones concern security and AI. In this week's Embedded Executives podcast, I spoke to NXP's Ron Martino, Senior Vice President and General Manager of Business Line Edge Processing, to hear the company's responses to those important questions.
